

How to Remove the Mower Blade

Tools needed

_____ Closed end Combination Wrench or Socket Wrench

_____ Scrap piece of wood

_____ Leather Gloves

_____ Safety Glasses

_____ Put on leather gloves and Safety glasses.

_____ Remove the spark plug wire.

_____ Turn your mower on its side with the fuel tank fill spout up.

_____ Lay block of wood next to blade and hold firmly in place with your foot.

_____ Fit the correct sized wrench on the blade bolt and remove the bolt, bracket, and blade. On most mowers turn counter clock wise to loosen and remove the bolt and washer holding the blade.
